Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-9, 14 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The rejection under 35 USC 112 as set forth in paper #15 is deemed proper and is herein repeated. Applicant's arguments have been fully considered and have been found not persuasive.

Page 6 of the specification identifies steps which are intended to "modify the constitution" of the cereal grain. Applicants have failed to reconcile the inconsistency between the "not subject to treatment" claim limitation, with a clear teaching as to the need to "modify the constitution" of the cereal grain. Further, it appears necessary to treat the cereal grain so as to obtain the product having the average granulometry as claimed.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-9, 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lim et al. or Suominen

4. The rejection set forth under 35 USC 103 in paper #15 is deemed proper and is herein repeated. Applicants remarks have been fully considered but have been found not persuasive.

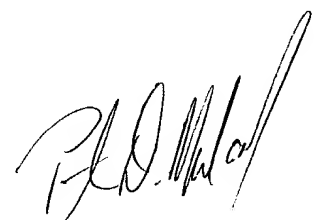

5. Each of the examples of Lim et al. shows using cereal grain flour products which have not been subjected to solvent extraction. Tables 1-4 identifies "None" under the

"Solvent" heading. These would comparative examples showing the products preferred by applicants. One of ordinary skill in the would understand the advantages and disadvantages of using the treated or untreated products. As such, the use of the untreated product is rendered prima facie obvious from this disclosure.

6. With respect to Suominen, the step of "splitting" is not seen to be a "treatment" step excluded. Rather, it is intended to "modify the constitution" of the cereal grain. This is seen to fall within the scope of the invention. The art states that the step is used to obtain a preferred particle size. Column 6, lines 59+ states that the process is used to the extent needed so as to obtain the particle size and interrupted once the desired size has been achieved.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
